Profile

Senior Project Manager bridging the gap between strategic business goals and technical execution, backed by a solid background in IT infrastructure and system administration. Currently at Globant leading large-scale digital transformations across the US and LATAM. Proven track record of owning P&L for portfolios up to \$5M, optimizing operations to scale profit margins to 45%, and directing cross-functional Agile teams of 30+ members to ensure on-time, on-budget delivery and measurable value for stakeholders.

Work Experience

Project Manager, Globant, Buenos Aires, Argentina

May 2021 to Present

- Direct large-scale digital transformation initiatives across US and LATAM markets, managing project portfolios with budgets ranging from \$700k to \$5M.
- Own financial forecasting and P&L, successfully driving continuous improvement to increase account profit margins from 40% to 45%.
- Build, lead, and scale high-performing cross-functional Agile teams of up to 36 members, fostering collaboration and professional development.
- Spearheaded the development of a Digital Twin Studio, coordinating squads to accelerate innovation and deliver business outcomes.

Project Manager, XOOR (Freelance), Buenos Aires, Argentina

Mar 2022 to Dec 2022

- Led the delivery of web and mobile development projects using Scrum methodology to align outcomes with business goals.
- Designed and executed comprehensive project plans, facilitating sprint planning and backlog refinement.
- Strengthened cross-team collaboration and efficiency by applying Agile frameworks and driving continuous improvement.

System Administrator, ExxonMobil, Buenos Aires, Argentina

Dec 2018 to May 2021

- Developed and implemented a Power BI dashboard to track team KPIs and oversee the seamless transition of tasks to a Managed Service Provider (MSP).
- Managed infrastructure deployments and configuration for enterprise web environments, ensuring compliance with strict security standards.
- Led troubleshooting and continuous improvement initiatives to mitigate vulnerabilities and enhance system stability.

Technical Project Lead, gA Corporate, Buenos Aires, Argentina

Feb 2014 to Dec 2018

- Led end-to-end UNIX to Windows migration projects for Johnson & Johnson MD&D, ensuring on-time delivery and strict adherence to budget constraints.
- Directed database assessments and performance testing phases for J&J Ethicon, aligning technical execution with compliance requirements.
- Managed the Create! form Server Migration Project, acting as the main liaison between IT managers and external vendors to secure user acceptance and project sign-off.

Education

UADE, Buenos Aires, Argentina

Bachelor's Degree in Management of Information Systems, Apr 2014 to Dec 2020
